RAVAK Design

SIMPLE ORIGINAL SOLUTIONS, A CLEAR CONCEPT FOR EACH DESIGN, AND PRODUCTS THOUGHTFULLY CRAFTED IN TERMS OF THEIR UTILITY.

Kryštof Nosál

Czech product designer, author of many RAVAK bathroom products. He believes in the principle of uncomplicated, clean solutions. He has received Red Dot, iF Design Award, EDIDA, Good Design, and other awards for RAVAK products.

Vrtiška & Žák

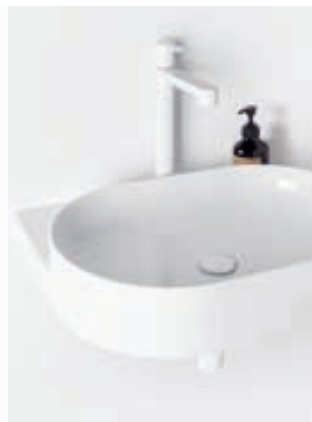

The founders of the Prague Vrtiška & Žák studio, with over a decade of tradition. They are united by diligence, a desire to overcome challenges, and the ability to see potential even where it remains hidden to others. Their work encompasses a complex range of areas from product design to interiors and architecture, from craftsmanship to industrial scale. Creativity and unconventional thinking are essential values for the development of their work.

Achim Storz

Austrian product designer, author of RAVAK bathtubs and automotive interiors for brands such as Porsche, BMW, Audi, and others.

RAVAK DESIGN HAS REPEATEDLY ACHIEVED SUCCESS IN INTERNATIONAL COMPETITIONS.

RAVAK technology

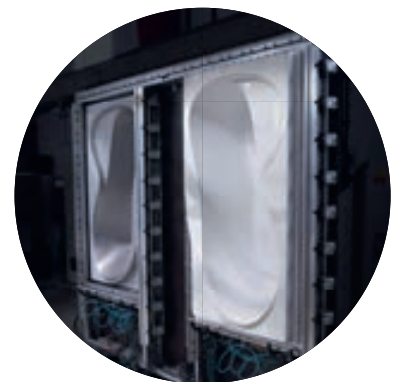

THE LATEST TECHNOLOGIES
GUARANTEE THE HIGHEST QUALITY

Quality of RAVAK products

Not only the quality of materials but also the technologies used influence the final result. As the only ones in Central and Eastern Europe, we operate our own galvanizing plant and painting shop, which guarantees us 100% control over the surface finishes of our shower enclosures, doors, and bath screens.

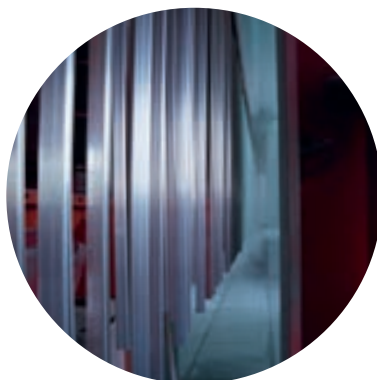

For the production of shower enclosures, we apply a highly durable satin finish to their aluminium frames. The satin finish is created through a chemical process that forms a hard, abrasion-resistant and further oxidation-resistant layer of aluminium oxide on the surface. This ensures exceptional scratch resistance and stands up to very aggressive conditions, such as significant temperature fluctuations, high relative humidity, and exposure to various chemicals that shower enclosures encounter in bathrooms. In the production of bathtubs, we use advanced vertical spot heating technology, which allows us to perfectly stretch the acrylic sheet into the mould.

RAVAK Press Shop
The creation of an acrylic moulding
of a future bathtub using vertical
heating technology.

RAVAK Galvanizing Plant
Anodising of aluminium profiles – manufacturing the most durable profiles for shower enclosures, doors, and bath screens.

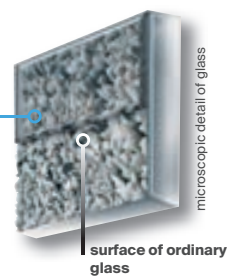

RAVAK Paint Shop
Electrostatic application of powder coating to aluminium profiles of shower enclosures, doors, and bath screens.

glass surface treated with RAVAK AntiCalc®

GLASS PROTECTION

microscopic detail of glass

surface of ordinary glass

RAVAK AntiCalc®
A revolutionary technology that creates an invisible water repelling protective shield on the glass surface.

Check out black

BLACK IN THE BATHROOM STANDS OUT DUE TO ITS UNIQUENESS.

Why choose predictability when sophistication is available? Where white is expected, it is black that captivates. It becomes what endures in memory and allows other elements to shine. In our range, you will find six series of shower enclosures, bathtubs, bath screens, seats, taps, sanitary ceramics, accessories, and fittings in black.

RAVAK

concepts

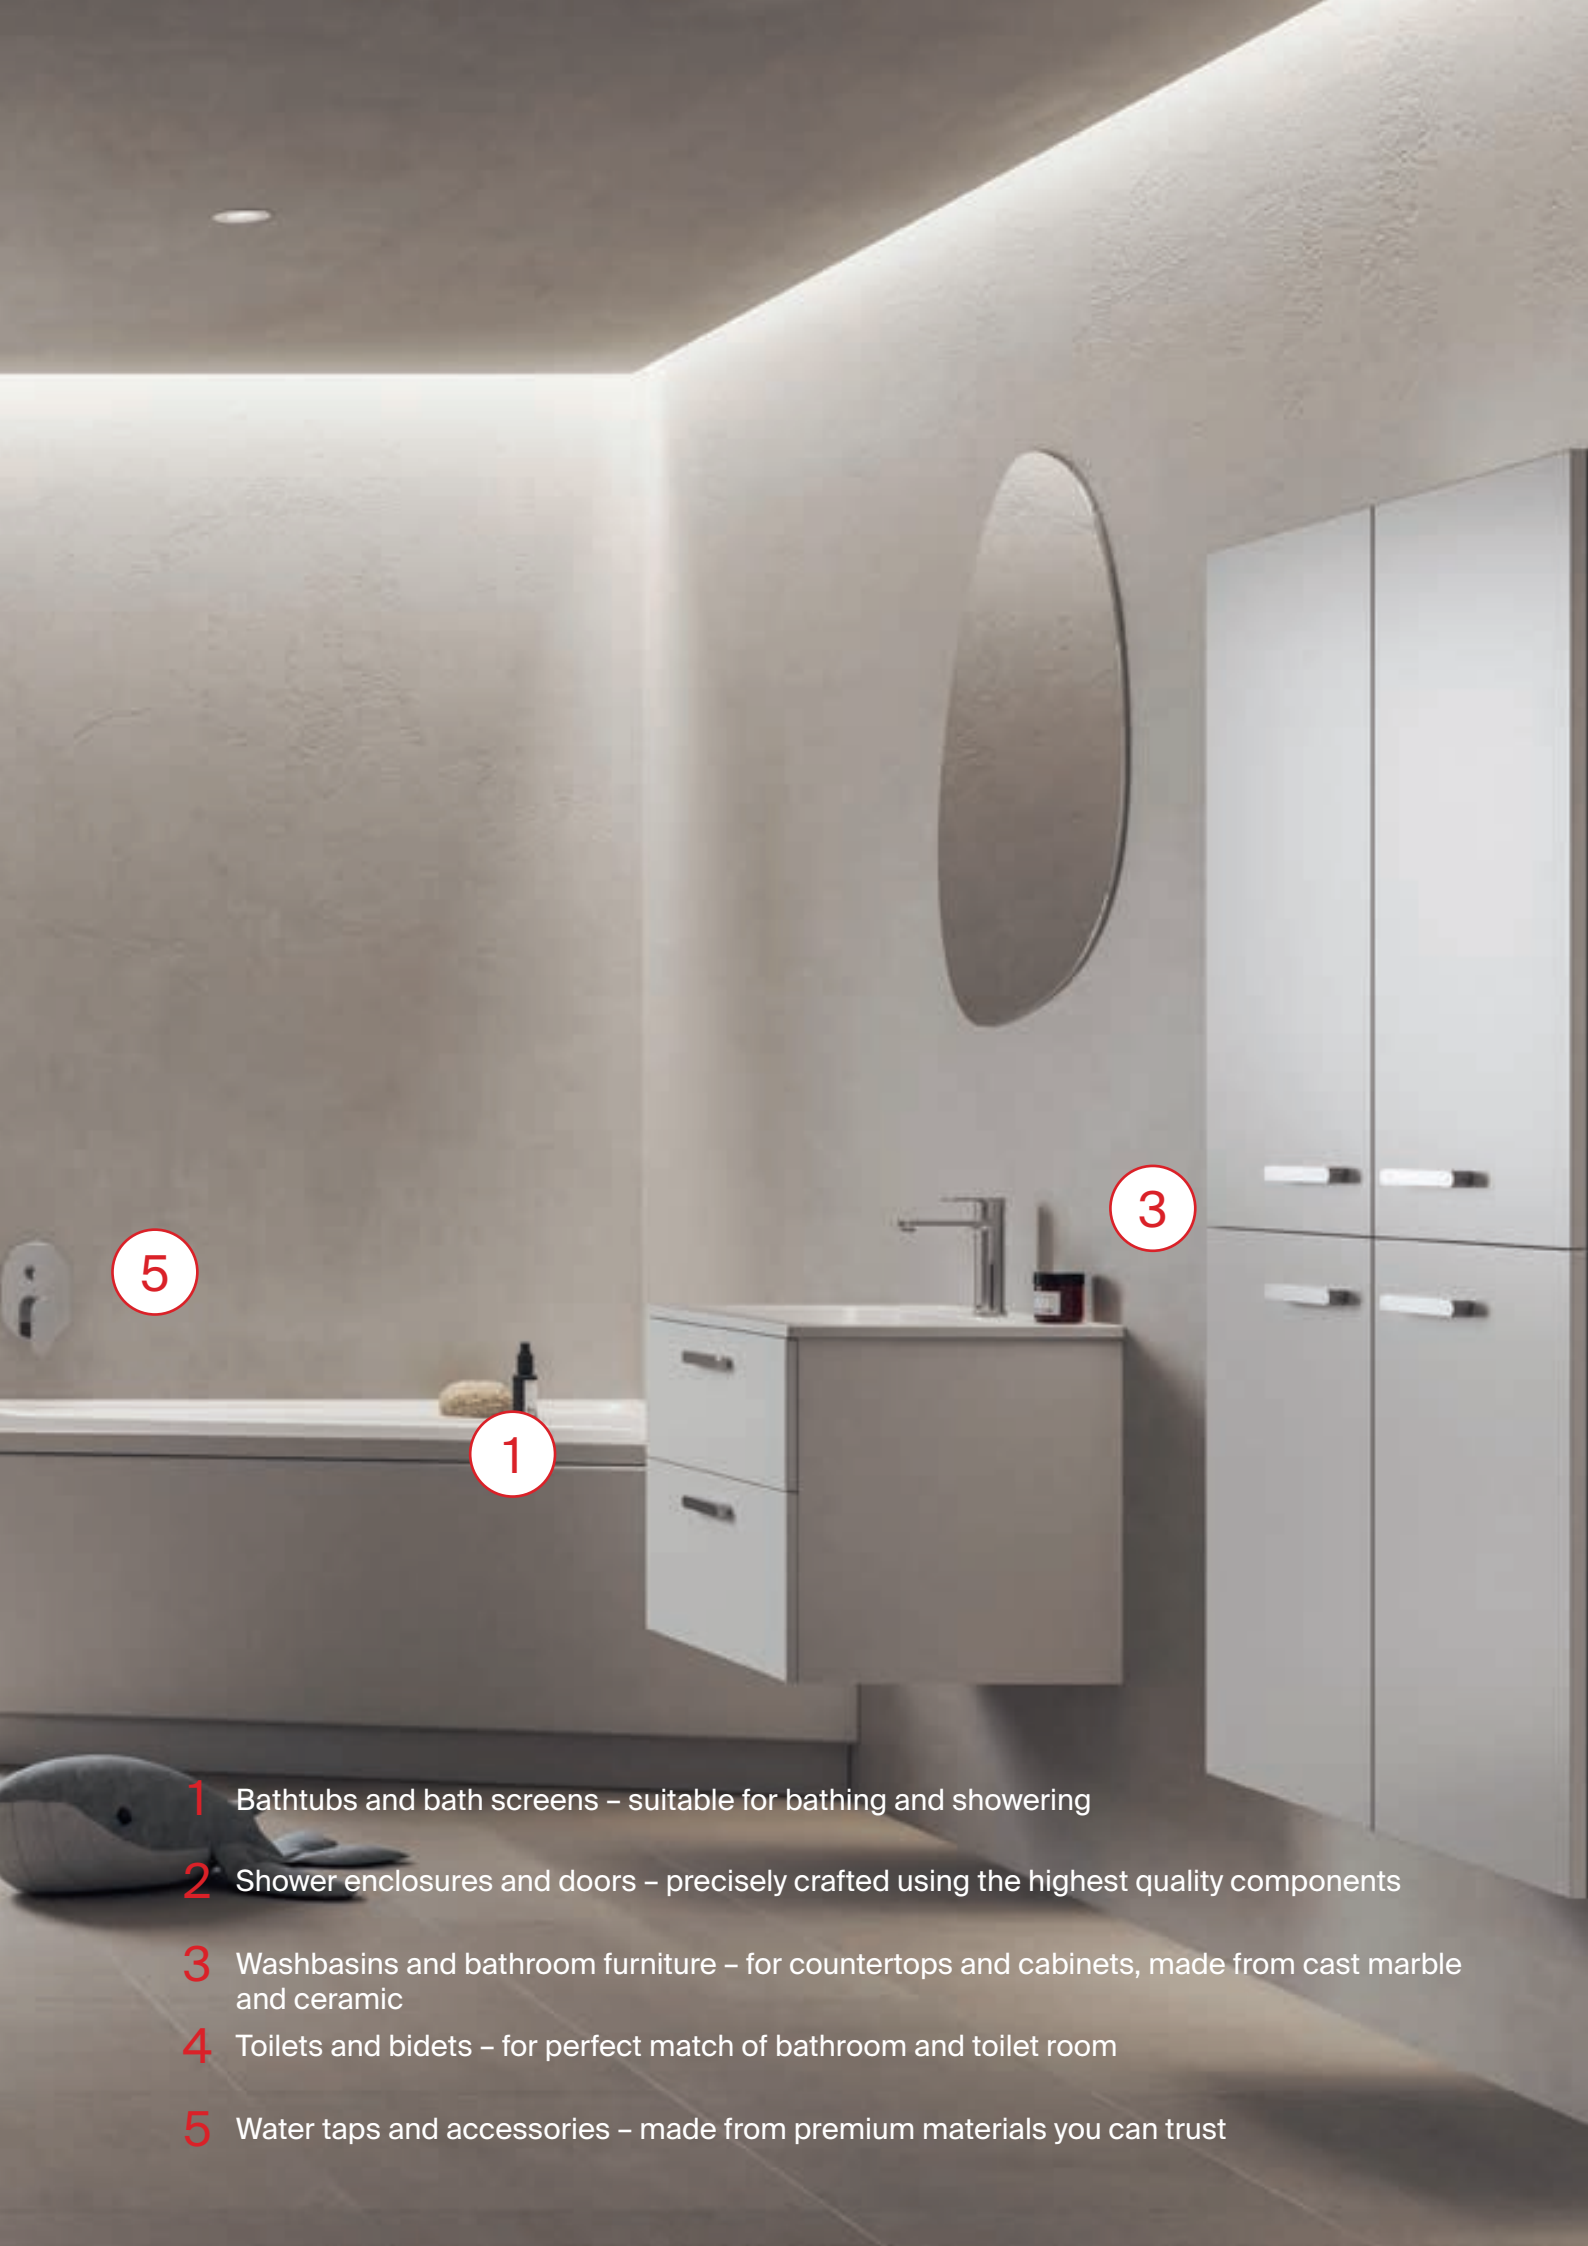

A perfectly matched set for every bathroom and toilet room

Whether you prefer bathing or showering, or if you are looking to furnish a toilet room, you will definitely find something to suit your needs among the RAVAK concepts. We offer aesthetically coordinated sets of bathtubs, shower enclosures, shower trays, washbasins, furniture, water taps, toilets, and accessories that logically connect, have a clear concept, and are developed based on decades of our professional experience, with a design that will continue to delight you. RAVAK concepts are suitable for bathrooms of all sizes, from the smallest to the largest. Only RAVAK offers the widest range of design-coordinated concepts on the market – the universal Chrome concept, which includes over 250 items for both bathrooms and toilets.

2

4

5

1

3

- 1 Bathtubs and bath screens – suitable for bathing and showering
- 2 Shower enclosures and doors – precisely crafted using the highest quality components
- 3 Washbasins and bathroom furniture – for countertops and cabinets, made from cast marble and ceramic
- 4 Toilets and bidets – for perfect match of bathroom and toilet room
- 5 Water taps and accessories – made from premium materials you can trust

Chrome concept – the widest concept on the Czech market

Design by Kryštof Nosál

**Harmoniously matched down to the last detail.
Baths are also available in a variant with a rim height of only 18 mm.**

Corner bathtubs with a practical seat or rectangular bathtubs

Bath screens

Shower enclosures in various designs

Shower trays

Seats

Washbasins, double washbasin, small washbasin and bathroom furniture

Toilets and bidets

Water taps

Bathroom accessories

There is beauty in simplicity – Classic II concept

Design by Kryštof Nosál

**A richly equipped concept for the entire bathroom and toilet room.
A timeless design that never gets old.**

Bathtubs with wide and flat bottom

Washbasins, double washbasin and small washbasin in various sizes

Bathroom furniture in two colour options with high-quality impregnation and fittings

Classic toilet

Water taps

**5-year warranty on all
shower enclosures
and doors**

Shower enclosures

**Everyone can find something
to suit their taste.**

Don't let conventions limit you; create a space for pleasant relaxation exactly as you envision. The shower area can be designed in many ways. Choose the optimal solution for you and combine elements until you achieve perfect satisfaction. We have a solution for every requirement.

The unifying principle remains uncompromising quality, the tightness of the shower enclosures, and the guarantee of their long-term durability.

Parameters for selecting a shower enclosure and doors

Hinged - outwards

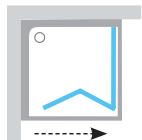

Cool!, Brilliant, SmartLine

Swivel pivot - outwards

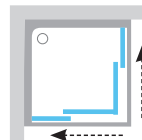

Nexty, Pivot, Supernova

Folding - sliding

Blix

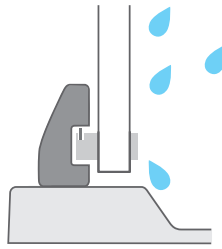

Sliding

Matrix, Blix Slim, Blix, Supernova

Tightness

Framed shower enclosures provide optimal protection against splashing water. The higher the lower horizontal profile, the better the protection. The shower enclosure or doors will retain water even during intense showering.

Frame at the bottom of the shower enclosure:
Nexty, Pivot, Blix Slim, Blix, Supernova

Threshold bar at the bottom of the enclosure:
Cool!, Brilliant, SmartLine, Matrix, Chrome

Wall and extension profiles for the Nexty, Pivot, Blix, Supernova, and Cool! series

Extension profiles

They allow for the adjustment (extension) of the shower enclosure or doors (or bath screen) by 2 cm on each side.

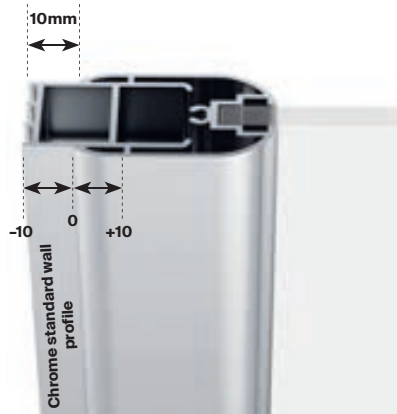

We produce extension profiles for the following series of shower enclosures and doors: Nexty, Pivot, Blix, Supernova and Cool!.

Wall profiles

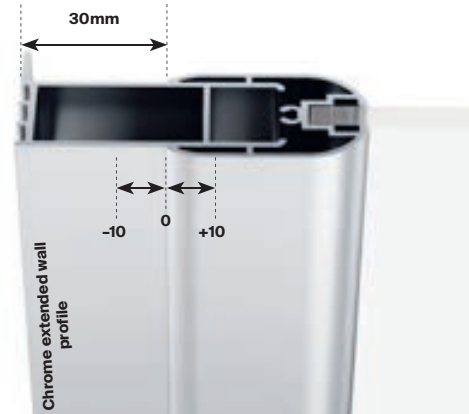

They are used to attach the shower enclosure or doors to the wall. **They are included with every product where they are necessary.**

Chrome wall profiles

The standard wall profile is included in every package of the Chrome product and allows for adjustment (extension/contraction) of the product by 10 mm.

If you need to expand the product even more, you need to purchase a new extended wall profile, which is 20 mm wider and allows for an additional expansion of 20 mm while maintaining a tolerance of +/- 10 mm.

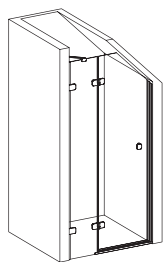

Extended wall profile

Dimensions and assembly

If you need to address height, slopes, cut-outs, non-standard curves, barrier-free entrances, and more, please contact us at export@ravak.com or by phone at **+420 318 427 288**.

RAVAK Custom Solutions

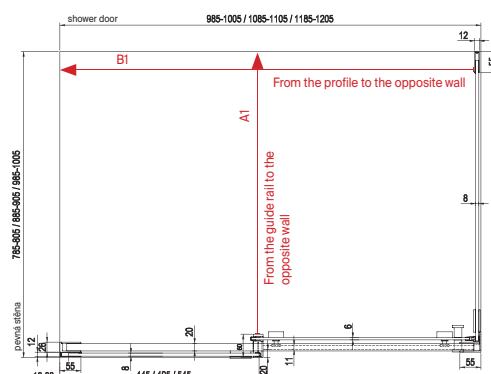

Custom shower doors in an attic (slope)

When installing a shower enclosure directly on the floor (without a shower tray), refer to the document titled „Construction readiness“ located in the Customized Shower Enclosures section on www.ravak.com.

Construction readiness

RAVAK AntiCalc® technology

The best care comes directly from the manufacturer.

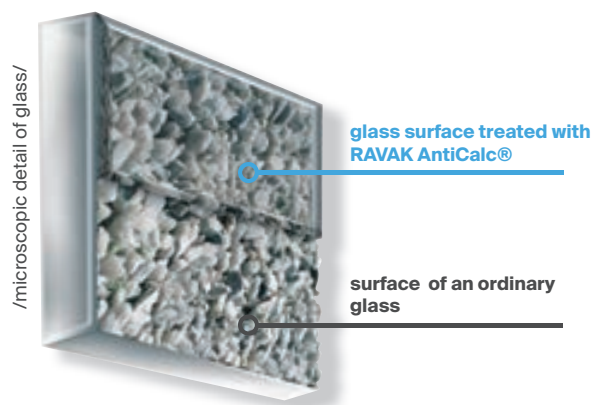

Invisible shield against dirt and deposits on glass

Every water source, except for rainwater or distilled water, always contains a certain amount of salts. These deposits, known as limescale, can be removed only with great difficulty. They form a chemical bond with the glass and, over time, can cause unsightly discoloration. Commonly available chemical products are completely ineffective against limescale. Only the patented glass treatment technology RAVAK AntiCalc® can reliably prevent permanent staining. RAVAK applies this treatment to the glass of its shower enclosures and screens during the manufacturing process.

RAVAK AntiCalc Conditioner

We recommend renewing the water-repellent effects of our technology every three months (depending on water hardness) by applying RAVAK AntiCalc Conditioner.

Custom solution configurator

Create a product tailored to your needs online, from the comfort of your home.

The configurator offers options for custom designs of shower enclosures, shower doors, fixed panels, or bath screens/doors. For the selected model, you can choose the frame colour or type of hinge, the desired decor of the glass or plastic panel, and the width, depth, and height of the product.

1. SERIES AND TYPE

2. FRAME COLOUR

3. PANEL DECOR

4. DIMENSIONS

The defined product can be sent either as an order, or you can find the nearest dealer with whom you can consult and order the selected product. More about custom solutions at <https://atypical.ravak.com>

RAVAK Custom Solutions

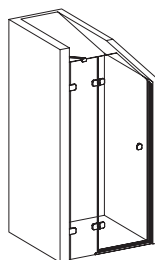

Decor options for the panels in the configurator can be found on page 18.

Need something special?

We will solve problems with slopes, cutouts, and non-standard arcs.

Contact us at export@ravak.com
or by phone at **+420 318 427 288**.

Custom shower doors in an
attic (slope)

All seats can be folded against the wall

Large-format shower trays

- Large-format shower trays with a low threshold allow for the shower area to be adapted to spacious bathrooms
- A unique surface inspired by the texture of natural materials
- The trays can be trimmed during installation to fit the shower enclosure area
- PerfectClean prevents the growth of microorganisms and mould
- Extended 5-year warranty
- We recommend the Start waste trap for the shower tray

Shower trays

Shower trays

Don't forget about a quality shower tray – most leakage problems are caused by a poorly designed tray that lacks a well-thought-out installation method.

- For over 30 years, we have been manufacturing shower trays that function smoothly and efficiently in hundreds of thousands of households
- Acrylic shower trays made from a special material with antibacterial treatment
- Shower trays made of cast marble with a modern or classic design and/or with an anti-slip finish
- We provide a 5-year warranty on cast marble shower trays
- The radius of the shower trays is 500 unless otherwise stated

Free-in-the-floor shower channels and point drain

- They unify bathroom surfaces and highlight the beauty of ceramic tiles
- They remove barriers when entering the shower area
- Installation is made easier by their low construction height (from 75 mm) and quick, precise assembly
- The shower channels are available in two versions – stainless steel or plastic with a stainless steel grid
- Both the grate and the channel are made of high-quality stainless steel with a special coating that prevents dirt buildup
- Perfect and easy cleaning of the entire shower channel, including the waste trap
- The waste trap flow rate of 60 l/min guarantees safe drainage of all incoming water

Showering in a bathtub

Do you want to shower comfortably in a bathtub without splashing water all over the bathroom? We have the solution for you. Get a bath screen.

- You no longer have to choose between bathing and showering; enjoy both – showering in the bathtub.
- With bath screens, you can feel comfortable even when showering – without unnecessary bending and splashing.
- The installation of bath screens is very simple; it only takes three screws, and you're done.
- **Most bath screens are also suitable for all standard bathtubs, making them perfect also for finished bathrooms.**

Bath screens

They do not cover the entire shower area. With reasonable showering, they can ensure that the vast majority of water stays in the bathtub. Bath screens are available in a variety of shapes and sizes, suitable for classic rectangular bathtubs as well as asymmetrical or corner bathtubs.

Universal bath screen for a classic rectangular bathtub

Original folding bath screen for corner bathtub

Accessories for shower trays and bathtubs – cover strips

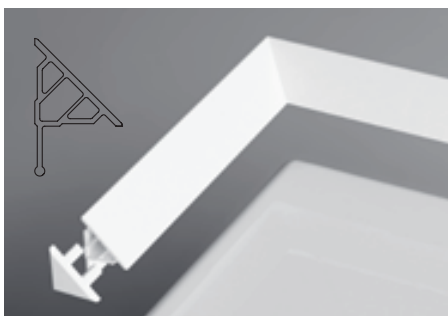

Cover strips

- Optimal covering and sealing of joints suitable for all types of shower trays and bathtubs
- Easier and more efficient cleaning of accumulated dirt
- Available in lengths of 1100 and 2000 mm, and in types covering joints of 6, 10, or 11 mm

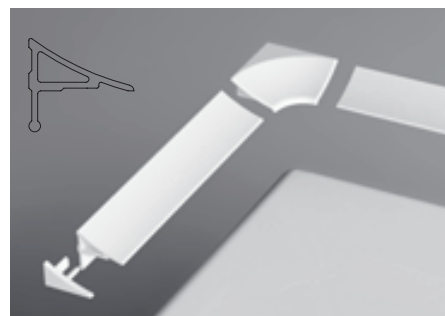

Cover strip 6

- seals the joint up to 6 mm
- It can be complemented with a set containing 2 end caps for the cover strips (L/R) and 2 corner connectors

Cover strip 10

- seals the joint up to 10 mm
- It can be complemented with an end cap
- The corner is created by cutting at a 45° angle

Cover strip 11

- seals the joint up to 11 mm
- It can be complemented with a set containing 2 end caps for the cover strips (L/R) and 2 corner connectors

Universal mounting kit

- For perfect sealing of the shower tray during installation
- This will achieve a visually perfect and functional connection of the shower tray to the bathroom wall

Universal mounting kit includes:

RAVAK Professional silicone sealant, white, 310 ml
Self-adhesive foam strip 2200 mm
2 pieces of cover strips 6/1200 mm
2 pieces of corner connectors for cover strips

Accessories for shower trays – shower tray waste traps

Shower tray waste traps

- High water flow of up to 30 litres per minute is ensured by waste traps with a diameter of 90 mm
- Shower tray waste traps are top-cleanable by removing the cover, which is a fundamental requirement for their use with „fixed“ installations
- Individual waste traps differ primarily in the type of material used for the waste trap cover and its shape

Basic / Start

Shower tray waste trap with a stainless steel cover
Shower tray waste trap without stainless steel cover

Standard

Shower tray waste trap with a cover made of plated plastic

Professional

Shower tray waste trap with metal cover

Sabina waste trap

It is designed for the Sabina deep seating shower tray with an opening for a waste trap and an overflow of Ø52 mm. The water drainage from the tray is controlled by the Click-Clack system (pressing the waste plug stops the drain and pressing again opens the drain).

Waste pipe reducer 40/50

Reduces dimensional differences between waste traps and waste pipes.

Silicone sealant

Silicone sealant RAVAK Professional – 310 ml
Perfectly seals the shower enclosure, bathtub, or shower tray.

Accessories for bathtubs – bathtub waste sets

- Bathtub waste sets are made of the highest quality materials
- They are suitable for all types of bathtubs
- We offer two basic types – classic bathtub waste sets with overflow and bathtub waste sets with overflow filling
- For drainage control, we manufacture the Click-Clack mechanism (where pressing the waste plug closes the drain, and pressing it again opens it) and the so-called Bowden mechanism (where rotating the upper control element moves the waste plug between the open and closed positions)

Bathtub waste sets with overflow filling

Classic bathtub waste sets with overflow

Bathroom and cleaning products

Every bathroom requires maintenance.
Avoid using untested cleaning agents and opt for products recommended by the manufacturer!

RAVAK Cleaner Effectively cleans the entire bathroom

- It reliably removes grease and residual water deposits.
- It is primarily intended for acrylic bathtubs, shower trays, and shower enclosure panels, but also for water taps, bathroom furniture, and ceramic tiles.

RAVAK Cleaner Chrome For water taps

- Special cleaner for removing grease and residue from chrome surfaces—water taps, water taps accessories, and chrome surfaces of shower enclosures.

RAVAK AntiCalc® Conditioner Domestic helper in the fight against limescale

- With proper and regular use of the AntiCalc® Conditioner, we guarantee the full functionality of the RAVAK AntiCalc® system for 10 years.

RAVAK Turbo Cleaner Effectively cleans drains

- Highly effective product designed to dissolve the most stubborn dirt accumulated in the waste traps of baths, shower trays, and washbasins.
- It must not be used to clean products and especially their metal parts!

Professional durable RAVAK lubricant

- Use on the rollers and hinges of shower enclosures, doors and screens, on cartridges and moving parts of taps, as well as locks and door handles.
